DRAFT PARK PLANS FOR ISO KALLAHTI PARK AND ULLAS PARK ON DISPLAY

The City of Helsinki is drawing up park plans for Iso Kallahti Park and the north part of Ullas Park in Meri-Rastila. The drafts of the park plans will be presented to the residents in the joint event for current matters on Tuesday 10 November 2026 at 17.00–19.00 at Cultural Space Merirasti.

The draft park plan can be viewed from 4 to 17 November 2026 on the City of Helsinki website at https://paatokset.hel.fi/fi/kuulutukset-ja-ilmoitukset/katu-ja-puistosuunnitelmat (in Finnish). For advice on how to access the park plan material, please contact the customer service of the Urban Environment Division by telephone, **+358 9 3102 2111, Mon–Thu 8.30–16.00 and on Fri 12.00–15.00** or visit the customer service at Työpajankatu 8 **Mon 12.00–15.00, Tue-Wed 8.30–12.00 and Thu–Fri 12.00–15.00**.

The design of the park is based on the existing local detailed plan. The functionality of the beach in Iso Kallahti Park is improved by adding play and exercise equipment, wooden platforms and groups of picnic tables and chairs in the area. The natural values and valuable large pines in the park are protected by centralising the functionalities in open areas and by directing people to established routes in order to preserve the forest floor vegetation and reduce the wear and tear of the roots of trees. The network of paths in the park is improved, and bat-friendly lighting will be installed in the main route through the park and the exercise area. The parking area of the beach is made clearer, and the diversity of the current fields is developed. At the residents' request, fruit trees will be planted in the north-western part of the park. The routes in Ullas Park are improved and made more compatible with the street plans of Meri-Rastilantie.

Before the proposals for the park plans are approved, they will be officially made available for public viewing for two weeks on the Urban Environment Division's website at https://paatokset.hel.fi/fi/kuulutukset-ja-ilmoitukset/katu-ja-puistosuunnitelmat (in Finnish). This public display period will take place in early 2027 and give the stakeholders an opportunity to submit an objection. The owners and occupiers of properties bordering the park will be notified of the public display by post.

The park plans are intended to be approved in winter 2027, and the preliminary schedule places the beginning of the construction of Iso Kallahti Park in summer 2027. The construction of Ullas Park is set to take place at the same time as the construction of the street area. **We would welcome any feedback on the draft park plans currently available for viewing by 17 November 2026.**

You can follow the decision-making on the park plan on the City of Helsinki website:
